

## Ideas for summer intern projects at RoMeLa UCLA

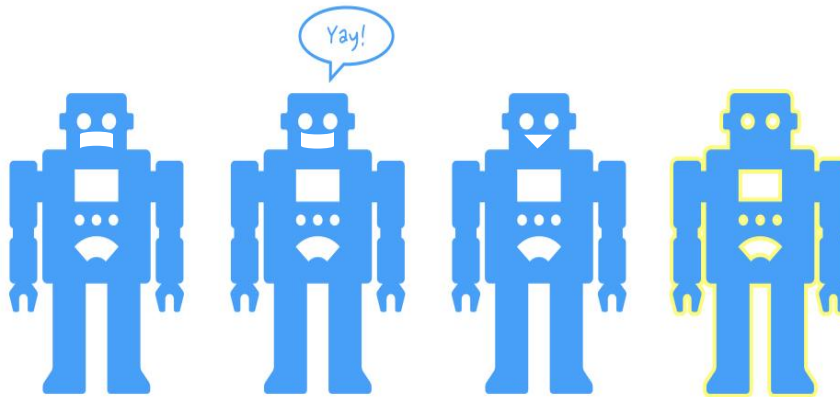

Jihyo Park

7/8/2019

### Idea 1

Use sound, light, animation, or display to express robot's status and emotions (ex. after a goal and before shooting)

Make the robot have expressions!

### Idea 2

Automatically post important realtime game situations from robot's output signals on social medias (facebook, instagram, tweeter)  
(Can help tracking the robot's history to improve after the game)

Logging, broadcasting, sharing, and tracking
